This is the platinum package with built in call outs, which is fully customised to your needs, providing a complete bespoke solution.

Remote Gate Engineer Log On

NEW!

This is a highly advanced bolt on package that can be added to any service contract (as long as your equipment is compatible if not installed by Harling Security), that enables us to remote on to your gates within an hour of notifying us of a fault. This enables us to carry out full diagnostic testing and to diagnose the fault without visiting site. It saves costs and allows us to attend site with the correct parts. In some instances it allows us to fix the fault remotely and carry out adjustments to the gate settings. It also allows us to programme remote control fobs and post them out pre-programmed if additional fobs are needed.
